BSc in Accounting, Banking and Finance

Programme Description

The Bachelor Programme in Accounting, Banking and Finance has a strong focus on practical applications without sacrificing academic rigour. It provides a solid foundation in all traditional financial disciplines, providing participants with the analytical tools for a successful career in professional and academic positions related to accounting, finance, capital markets, investment management, corporate finance, and risk management. The curriculum is highly integrated and accelerated, allowing for the study and mastery of a broad range of skills.

The Bachelor in Accounting, Banking and Finance has two specializations, in Banking and Finance, and Accounting.

The first two years the two specializations share the same curriculum that comprises courses in finance, economics, accounting, mathematical and statistical reasoning and business studies. In the third and fourth year the two specializations are differentiated through the use of electives, appropriate for each specialization.

Our graduates will be well-grounded in financial theory, capital markets, investment management techniques, investment and commercial banking, financial risk management, accounting and insurance.

A career within the field of Accounting, Banking and Finance is exciting and rewarding. The world of finance, with its diverse career opportunities and continuing demand for capable professionals, is an attractive career choice for high-calibre individuals. This Programme allows graduates to work for organizations of all sizes in specialist fields that include Investment & Commercial Banks, Hedge Funds, economic organizations or the government. Also the rigorous nature of the Programme prepares students for graduate work either in accounting or finance or in a business related programme.

The BSc in Accounting, Banking and Finance at Neapolis University Pafos will definitely enhance your career prospects in the current job market.

Career Prospects

Graduates from this programme can have a successful career in professional positions related to finance, capital markets, investment management, corporate finance, and risk management.

BSc in Business Administration

Programme Description

The BSc in Business Administration at Neapolis University will enable you to develop a critical awareness of the main functional areas of Business Administration and the management process within a variety of organisations. It will develop your innovative and intellectual problem-solving and communication skills and aid your understanding of the business world.

With this degree you can be confident of being work-ready and equipped with the skills required for professional and managerial roles in the modern, global business environments. Core studies include accounting, economics, finance, management, marketing and law. A flexible course structure allows you to create a study programme that suits you and your career interests, and to combine business administration studies with the business informatics or management degrees.

The main objective of the undergraduate Programme in Business Administration is to provide students with the knowledge and skills that are necessary for success in a fast changing, global business and economic environment. The Programme curriculum covers the basic disciplines of management, and allows, a deeper understanding of human resources management, marketing and business strategy. The programme uses a variety of pedagogical approaches that help students become familiar with the problems they will face as managers, entrepreneurs and business leaders.

In this programme the emphasis is on students' obtaining administrative and communication skills as well as deep understanding of the business decision-making process. Such skills and knowledge are transmitted to students so as to enable them to prepare and critically analyze business plans and understand complicated administrative structures as well as promote innovation.

The learning objectives are achieved through lectures, seminars, case studies and the use of audiovisual material. The involvement of students in presentations, group work, research and data processing is encouraged at all stages of the programme.

Career Prospects

Graduates will have a solid understanding of the basic business disciplines as well as the economic, political, legal and environmental context in which the global practice of business is conducted. Thus they will be ready to work in managerial positions at all different types of organizations and in a wide variety of industries.

BSc in Economics

Programme Description

In studying economics you will learn how individuals and society make choices about how scarce resources are used, what products are produced and who gets to consume them. These choices depend on evaluating costs, benefits, risks and effects on others. The constraints affecting these choices are many and include income, technology, natural resources, legislation and time.

Economics is traditionally divided into two broad branches: microeconomics and macroeconomics. Microeconomics involves the decisions of individual units, such as a firm producing goods and trying to make a profit or a household earning income, buying products and trying to achieve the highest level of satisfaction. Macroeconomics looks at the factors that determine the total output of the economy as a whole and analyses the mechanisms that cause inflation, unemployment and growth.

All of our students study microeconomics and macroeconomics, but there is also a great deal of choice within our Programme. Indeed, Economics at Neapolis University is taught in conjunction with the business disciplines of finance, marketing and management and enables students to use economic reasoning taking into account the business context in which economic decisions are taken.

Career Prospects

Students graduating from the programme will have a good understanding of key economic concepts, theories, and analytical skills to critically interpret and manipulate economic data. They will possess communication, IT and research skills to express their views in a professional and effective way and will have acquired through their training the ability to work effectively as part of a team. Graduates of the programmes will be ready for successful careers in the financial sector, in government as economists, or for graduate study.

Business Administration (MBA)

Programme Description

The MBA Programme at Neapolis University Pafos provides an advanced course of studies to those aspiring to follow a successful career in management. The key mission of the Programme is to enable students to realize their potential through a pedagogical approach that employs theories and rigorous reasoning to inform practice that utilises the participants' work experience, that instils new skills, and provides new knowledge in a real-life business environment.

The MBA Programme develops the participants' ability to make informed professional decisions, by broadening and deepening their understanding of market, financial and management functions and processes; it equips students with skills of business research, analysis and modelling, and emphasises the role of creativity in a continually changing and competitive business environment. All students are encouraged to understand the role of information and technology in innovation and to become aware of ethical, social, environmental and global issues affecting management decisions.

The Programme is tailored to the individual needs of working students and provides a flexible route to an advanced Master degree. The Programme is delivered through a combination of weekend teaching (approximately once amonth) and e-learning technology, which allows students to participate in the Programme from home. The Programme runs over two academic years and is delivered by combining face to face tutoring, a variety of distance-learning sessions, and state-of-the-art web-based support.

The Programme offers the following specializations: Marketing, Sports Management, Communications and Media Management, Insurance and Risk Management, Entrepreneurship and Innovation Management, Accounting, Management of Information Systems, Shipping Management, Tourism Management, Financial Management, Real Estate and Construction Management.

Specializations:

- Financial Management
- Tourist Management
- Real Estate
- Construction Management
- General Management

Career Prospects

Graduates will find employment in a range of careers such as business analyst, business consultant, and business manager, government and/or private sector administrator, production supervisor, project planner, and sales and marketing manager. The specializations offer the skills to pursue careers such as public relations and fundraising manager, human relations manager, advertising or media professional, purchaser, buyer or trader, sales executive and supply chain manager. Moreover, graduates can pursue careers within corporate training, human capital consultancy, international human resources management and occupational health.

Programme of Public Administration (MPA)

Specialization:

Educational Management

Programme Description

The Graduate Programme in Educational Management is designed for mature students and aims to provide high quality education to recipients who aspire to become leaders in the field. The basic philosophy of the programme is the empirical approach regarding Educational Management, where new knowledge and expertise are gained and how these are placed into practice with participants who deal with real problems in education every day. This approach helps students to broaden and deepen their skills simultaneously in management and decision-making processes. The core curriculum emphasizes the acquisition of the required knowledge and expertise necessary, for the efficient development and management of resources allocated to the educational sector and for the understanding of major political issues from which stems the applied policy and administrative objectives set. The curriculum covers different thematic fields related to public policies on education, finance, human resources in the education sector and on varied European Union issues. For this reason, the theme of this programme was designed in such a way that explores the basics of the Public Policy in Education, on multiple levels and prepares students to take on increasingly complex responsibilities in this area

Additionally, students will have the opportunity to attend seminars on cutting-edge issues related to Education, within the framework of the Open Seminar regarding Special Matters, which will be conducted at regular intervals by qualified experts and managers of the sector, from within the country and abroad, who will be invited especially for this purpose.

Therefore, this program equips students with analytical specifications and leadership skills to strengthen their ability to make decisions in a constantly evolving and competitive economic environment.

Description of Programme / Duration of Study

The student may choose to follow the regular program lasting four semesters or the intensive program lasting three semesters.

Each course receives 7, 5 European credits (ECTS). Therefore the total number of ECTS required for completion of the program is 90.

For successful completion of the programme students are required to follow one of the following two options: (A) to prepare their thesis, which can take up to six months after passing their course, or (B) to attend four additional courses.

Admissions criteria

The Educational Management programme takes into consideration the academic background of the candidate from their previous studies, and the candidate's apparent ability to complete the program.

The required documents consist of all official certificates of academic qualifications and a statement of personal interest. Also a proficiency level certificate in English and two letters of recommendation that will be seriously considered as additional proof of competence.

Teaching language

Greek

Below we exhibit the intensive course structure:

Code	Course title	ECTS
Semester : 1		
MPA 500	Introduction to Public Administration	7.5

Thesis

The thesis takes the form of solving specific problems that students encounter during their work and / or refers to sectoral policies that are part of the functioning of the Educational Sector. The work is supervised by experts, whose involvement has been ensured by the University of Neapolis.

The student starts work on his/her thesis only after the Board Committee of professors approves the proposal, which the student is obliged to submit, and if approved could receive up to ten marks on the total score of the thesis.

Programme of Public Administration (MPA)

Specialization:

Public Healthcare Management

Programme Description

The Graduate Program of Public Healthcare Management is designed for mature students and aims to provide high quality education to recipients who aspire to become leaders in this field. The basic philosophy of the programme is the empirical approach regarding Public Health Care Management, where new knowledge and expertise are gained and how these are placed into practice with participants who deal with real problems in health care every day. This approach helps students to broaden and deepen their skills simultaneously in management and decision-making processes. The core curriculum emphasizes the acquisition of the required knowledge and expertise necessary, for the efficient development and management of resources allocated to the health sector and for the understanding of major political issues from which stems the applied policy and administrative objectives set. The curriculum covers different thematic fields related to public policies in the Health sector, finance, human resources in the health sector and on varied European Union issues. For this reason, the theme of this programme was designed in such a way that explores the basics of the Public Policy in Health, on multiple levels and prepares students to take on increasingly complex responsibilities in this area.

Additionally, students will have the opportunity to attend seminars on cutting-edge issues related to Health, within the framework of the Open Seminar regarding Special Matters, which will be conducted at regular intervals by qualified experts and managers of the sector, from within the country and abroad, who will be invited especially for this purpose.

Therefore, this program equips students with analytical specifications and leadership skills to strengthen their ability to make decisions in a constantly evolving and competitive economic environment.

Description of Programme / Duration of Study

The student may choose to follow the regular program lasting four semesters or the intensive program lasting three semesters.

Each course receives 7, 5 European credits (ECTS). Therefore the total number of ECTS required for completion of the program is 90.

For successful completion of the programme students are required to follow one of the following two options: (A) to prepare their thesis, which can take up to six months after passing their course, or (B) to attend four additional courses.

Admissions criteria

The Management of Public Healthcare Programme takes into consideration the academic background of the candidate from their previous studies, and the candidate's apparent ability to complete the program.

In addition, with the completion of the request form, other required documents include certificates from previous studies of the candidate and if applicable, a certificate to indicate the level of knowledge of English. Finally a report is required where the candidate expresses and justifies his/her interest in the specific postgraduate programme.

Special care and observation is provided to the student and thus developing a closer relationship between the student and the supervisor/expert, which may even lead to future cooperation between them.

The student starts work on his/her thesis only after the Board Committee of professors approves the proposal, which the student is obliged to submit, and if approved could receive up to ten marks on the total score of the thesis.

Programme of Public Administration (MPA)

Specialization:

General Administration

Programme Description

The Master of Public Administration is designed for mature students and aims to create public officers capable of responding to changes in the public administration sector and adapt to the challenges they encounter during their professional life. Therefore, the programme aims to provide high quality education to recipients who aspire to become leaders in the field of Public Administration.

It is well known that the curriculum in the Public Administration programme presents a considerable degree of complexity because they have to cover different topics, such as operating (public policy, finance, human resources, etc.), different sectors (Health, Education, Environment, Security, Regional issues, etc.), institutional and European Union issues.

The core curriculum emphasizes the acquisition of the required knowledge and expertise necessary for the efficient development and management of resources allocated to the public sector and for the understanding of major political issues from which stems the applied policy and administrative objectives set.

Additionally, the program prepares students with technical, analytical and computational specifications and leadership skills to strengthen their ability to make decisions in a constantly evolving and competitive economic environment.

The basic philosophy of the programme is the practical approach as far as the public administration programme is involved, where new knowledge and expertise is gained by experiences of participants through the study of real problems of everyday life. This approach helps students to broaden and deepen both their management and policy process skills.

Description of Programme / Duration of Study

The student may choose to follow the regular program lasting four semesters or the intensive program lasting three semesters.

Each course receives 7, 5 European credits (ECTS). Therefore the total number of ECTS required for completion of the program is 90.

For successful completion of the programme students are required to follow one of the following two options: (A) to prepare their thesis, which can take up to six months after passing their course, or (B) to attend four additional courses.

Admissions criteria

The General Administration Programme takes into account the academic background of the candidate from their previous studies and his/her emerging ability to complete the programme. In addition, to the completion of the request form, other required documents include certificates from previous studies of the candidate and if applicable, a certificate to indicate the level of knowledge of English. Finally a report is required where the candidate expresses and justifies his/her interest in the specific postgraduate programme.

Teaching language

Greek

Thesis

The thesis takes the form of solving specific problems that students encounter during their work and / or refers to sectoral policies that are part of the functioning of the General Administration Sector. The work is supervised by experts, whose involvement has been ensured by the University of Neapolis.

Special care and observation is provided to the student and thus developing a closer relationship between the student and the supervisor/expert, which may even lead to future cooperation between them.

The student starts work on his/her thesis only after the Board Committee of professors approves the proposal, which the student is obliged to submit, and if approved could receive up to ten marks on the total score of the thesis.

PAFOS

A City to study in!

The university campus is located in Pafos, a city declared an UNESCO World Heritage Site whose history and culture stretches back into the depths of antiquity.

Furthermore, it is a modern European multi-cultural city and a well-known international tourist destination. The presence of the remarkably rich historical past within the contemporary world, the combination of the mild Mediterranean climate, with the beautiful beaches and the well-preserved natural landscapes, as well as the vibrant and varied nightlife, the excellent transport links with other worldly cities and the wide-range of services provided, establish Pafos as an ideal place to live and study.

Throughout the year, the city and overall the district of Pafos host numerous cultural, scientific and sports events, enabling young people to get involved actively in the community. In addition, the university's cultural, social, athletic and other student clubs frequently arrange extra curriculum activities and trips, in order for students to develop their own personal interests and hobbies.

WHY PAFOS

- Pafos a city full of youth, having one of the highest rates of youth 18-35 years old, compared with other Cypriot cities.
- Pafos a modern European multicultural city that welcomes people from all over the world, regardless of ethnic, social or religious origin.
- Pafos a UNESCO World Heritage Site, as a crossroad of people and ideas with archaeological sites to testify a relentless march of 9000 years in history and culture.
- Pafos an international tourist destination, thanks to the unique combination of nature, history and mild Mediterranean climate. Direct flights between Paphos with large Greek cities like Athens, Patra, Thessaloniki and Chania

PAFOS IS A CITY WHICH COMBINES A RICH CULTURAL PRESENCE FROM ANCIENT TIMES UP TO THE PRESENT AND THE IMAGE OF A MODERN EUROPEAN CITY, WHILE IT IS ALSO A VERY POPULAR INTERNATIONAL TOURIST DESTINATION
