

## Create VPN Profile – iPhone

1. Start from the home screen. Go to "Settings".
2. Select "General".
3. Then proceed to "VPN".

4. Tap on "Add VPN Configuration...".

5. Tap on "Type". Select "L2TP" by tapping on it.
6. "Description" is the name of the connection, can be any as you like.
7. "Server" Add the IP of the VPN (185.106.103.103)
8. "Account" add the username (user)
9. "Password" type the password @M^En{DHep-R.G\_ of the user you add earlier.
10. "Secret" add the IPSEC pre shared key %MmMD2Kmy14VdnG\$y0
11. Click "Done"

12. Now connect by tapping the switch button to the right of VPN Status.
