- Monitoring and supporting (back office and in the field) the appropriate projects operation.

Job responsibilities:

- Active involvement in implementation engineering team
- Understanding of technical aspects like Mechanical/ Electrical or IT product solutions
- Manage workload in order to organise and prioritise daily and weekly goals

Profile of the ideal candidate:

- Knowledge field in Computer or Network Engineering
- It will be considered as an advantage experience in IoT systems, LoRaWAN and/or NB-IoT Networks or radio communication
- knowledge in wireless networks and/or sensor informatics
- knowledge of OS coding, IP protocols, interfaces and hardware subsystems
- Experience leveraging cloud technologies like Microsoft Azure or AWS
- Knowledge or willingness to learn and get involved with other innovative technologies, such as IoT or Smart City Solutions (Parking, Waste, Water, Environment)
- Excellent command of Greek and English languages (written and spoken)
- Confident and able to communicate effectively with all levels within the business.

- Able to multi-task with attention to detail,

- Analytical and problem-solving capabilities

- Strong work ethic, integrity, humility, discretion and flexibility

- Positive, service-oriented personality

- Passionate about gadgets, IoT and smart devices and new technologies

- Strong sense of responsibility & ability to complete tasks with min. supervision is a must

- Team player with friendly and outgoing approach who enjoys working alone and with teams

- This position might request visit to customers premises and travel for short period of times (15 – 20 %)

Join Our Team and:

- Be part of a fast-growing company

- Work with passionate professionals, who excel in their fields

- Learn in a challenging and friendly working environment

- Create your career path in dynamic organization

- Enjoy competitive salary according to qualifications and experience

- Get flexy, work from home 1 day/week

The closing date for applications is the 22nd of October 2021. Starting date in October 2021

All applications will have a confidential treatment.
