

## IT SECURITY OPERATIONS SPECIALIST

### **The Role**

Our Technology Department supports and drives the digital transformation of the Akelius business in seven countries worldwide

As an IT Security Operations Specialist you will collaborate with your team members in an agile environment. Driving and developing internal solutions for cyber defense and planning and implementing the IT Security landscape. You will be responsible for teaching, enforcing and improving the security architecture. Amongst others your duties will include the support of an Information Security Management System and the identification, analysis and documentation of cyber security risks

### **Requirements**

- Masters/Undergraduate Degree in Computer Science, Engineer or in a related field
- Experience with distributed software architecture is a strong advantage
- Certification (T.P.S.S.E., CISSP, CEH) is a plus
- Proficiency in spoken and written English
- Knowledge of any other language, including the German language will be considered an advantage (but not a prerequisite)
- Profound experience in IT Security, Network, Long Management (M365 Security, Cisco, Azure Sentinel)
- Positivity, professional maturity, enthusiasm and team spirit
- Working experience in a DevOps mindset
- Great knowledge in Secure Software Development, experience with security frameworks like OWASP
- Experience with Access and Identity Governance processes, software is a plus
- Creativity and an out-of-the-box thinking approach
- Passion for delivering outstanding customer experiences
- Desire to excel and stand out professionally

### **What we offer**

- Office in central locations
- International training program

- Internal promotion prospects
- Health and keep-fit allowance
- Fruit and refreshments in the office
- Up to 36 months unpaid parental leave
