

## ALUSTEEL CYPRUS

### Job Descriptions:

- **Site Engineer (2 years of experience):** Responsible for overseeing the construction process, ensuring adherence to timelines, quality standards, and safety regulations. The role requires coordination with project managers and other teams, as well as site inspections and progress reporting.
- **Project Engineer (4-6 years of experience):** Involves project planning, resource allocation, risk management, and monitoring project progress to ensure timely and efficient delivery. Candidates will be expected to handle technical and managerial tasks, liaising between different stakeholders to ensure the successful completion of projects.
