

Astrala Advisory Services Ltd

Junior Computer Scientist

About the Role

Join Astrala Advisory and become part of a high-performing technology team delivering mission-critical IT solutions to enterprise clients. As a Junior Computer Scientist, you will work alongside experienced engineers and architects, contributing to real-world projects while accelerating your technical and professional development.

Your Responsibilities

- 1 Collaborate with a multi-disciplinary tech team on large-scale software implementation projects
- 2 Develop, test, and maintain modern web applications across the full stack
- 3 Contribute to troubleshooting, bug fixing, and small automation tasks during initial ramp-up
- 4 Translate business requirements into scalable and maintainable technical solutions
- 5 Continuously learn and apply modern development practices, tools, and frameworks

Qualifications

- 1 Degree in Computer Science, Information Technology, or a related field
- 2 Prior experience in software development (internship or professional) will be considered an advantage
- 3 Exposure to backend development using **.NET or Java**
- 4 Knowledge of frontend technologies such as **React or Angular, HTML, JavaScript, and CSS** will be considered an advantage
- 5 Familiarity with database systems (**Oracle, MySQL, MSSQL**)
- 6 Strong command of both English and Greek

What We Offer

- 1 €1248 gross salary
- 2 Clear growth and career progression opportunities
- 3 Hands-on experience with enterprise-scale projects
- 4 Mentorship from experienced engineers and technical leaders
- 5 Continuous learning and professional development support

- 6 Participation in the **ANAD-funded graduate training programme (subject to eligibility criteria)**
- 7 A collaborative, supportive, and forward-thinking working environment
- 8 Hybrid work type
