SEARCH FOR THESES AND DISSERTATIONS

By selecting the “**Thesis & Dissertation**” community, you can search and browse undergraduate dissertations, Master’s theses, and doctoral dissertations available in the HEPHAESTUS Institutional Repository.

1. At the top of the page, different browsing and search options are available.
2. You can also use the **search field** by entering one or more keywords and selecting “**Search.**”

The screenshot shows the 'Thesis & Dissertation - Διατριβές & Διδακτορικές' page. At the top, there is a breadcrumb trail: HOME > THESIS & DISSERTATION - ΔΙΑΤΡΙΒΕΣ & ΔΙΔΑΚΤΟΡΙΚΕΣ > SEARCH. The main title is 'Thesis & Dissertation - Διατριβές & Διδακτορικές'. Below it, the permanent URI is provided: https://hdl.handle.net/11728/51. A note in English states: 'Here you can find all the Thesis or Dissertation of the Neapolis University in Cyprus.'

The 'Browse' section features a row of buttons: 'Search', 'Subcommunities and Collections', 'By Issue Date', 'By Author', 'By Title', 'By Subject', and 'By Subject Category'. A yellow arrow labeled '1' points to this row. Below these buttons is a search bar with the placeholder text 'Search the repository ...' and a 'Search' button. A yellow arrow labeled '2' points to the 'Search' button.

The 'Filters' section on the left lists authors with checkboxes and counts: Avgousti, Argyro (2), Christidou, Sophia (2), Christodoulou, Antreas (2), Constantinou, Christiana (2), and Delimpaltidou, Inna (2). There is a 'Show more' link and a 'Search author name' field.

The 'Search Results' section shows 'Now showing 1 - 10 of 2252'. The first result is titled 'Ο Αντίκτυπος της Τεχνητής Νοημοσύνης στη Διαχείριση Ανθρώπινου Δυναμικού' (The Impact of Artificial Intelligence on Human Resource Management) and is marked as an 'ITEM'. The description mentions a diploma thesis program and the role of Artificial Intelligence (AI) in human resource management. A 'Show more' link is visible at the bottom of the result.

SEARCH FOR THESES AND DISSERTATIONS

On the left-hand side of the page, **filters** are available to help you narrow down the results according to specific criteria, such as **Author, Subject, Date, Has Files, and Access Type**.

In the **Author** filter, you can either select one of the displayed names or use the **“Search author name”** field to locate a specific author.

By selecting **“Reset filters,”** you can remove any filters you have applied and return to the original list of results.

In the **“Settings”** section, you can also specify how the **results are sorted** and the **number of results displayed per page**.

Predicting NBA Rookie Impact from NCAA Statistics: A Machine Learning Approach Using Regularized Adjusted Plus-Minus (RAPM)

Abstract

Projecting which college basketball players will succeed in the NBA remains one of the most challenging tasks in professional sports. This study utilizes publicly available NCAA statistics to investigate whether machine learning models can predict players' rookie window impact, using Regularized Adjusted Plus-Minus (RAPM) over their first four NBA seasons as the proxy metric. Using data on 546 drafted players and undrafted free agents from 2008 to 2021, the analysis applies extensive feature engineering including era-adjusted efficiency metrics, per-100 possessions standardization, team quality ratings and team strength of schedule. A temporal train (2008-2018) / test (2019-2021) split is employed to evaluate whether the model can generalize on new, unseen data. Two models are compared: a regularized linear model (ElasticNet) and a gradient-boosted tree ensemble (XGBoost), with hyperparameter tuning via cross-validation grouped by draft year. Both models explain approximately 7-8% of the variance in the rookie window RAPM on the held-out test set. However, despite the modest R^2 values, both models demonstrated meaningful ranking ability, outperforming the aggregated pre-draft media consensus board (pooled Spearman ρ of 0.265 for XGBoost and 0.233 for ElasticNet vs 0.050 for consensus). Feature importance analysis shows that both models converge on defensive stops per 100 possessions, free-throw percentage, assists to turnover ratio and draft age as the strongest predictors of early career NBA impact. The findings indicate that while college statistics provide a limited but real signal for NBA projection, interpretable models can still add value as a supplementary tool to traditional scouting by identifying undervalued or overvalued prospects relative to consensus expectations.

Abstract

Sustainable development has become a powerful influence on the global real estate sector, and the use of green building rating systems such as LEED (Leadership in Energy and Environmental Design) has grown alongside it. In Cyprus, however, LEED certification is still uncommon and there is very little market evidence on its financial viability. This study sets out to examine the financial implications of LEED certification in Cyprus, with particular attention to the construction cost premium it carries and its effect on long-term asset value and investment performance. The aim is to test whether LEED is a financially viable option for developers, investors and owners operating in the Cypriot office market. The work uses a single in-depth case study approach with supporting market evidence, looking at existing LEED-certified office buildings in Cyprus. Primary data was collected through interviews with developers, valuers and other industry professionals. Secondary data was drawn from the international literature and from published cost studies of sustainable buildings. The findings are intended to improve understanding of how sustainable building certification plays out financially in the Cypriot market. The study also sets out a cost-benefit analysis framework that developers, investors and property professionals can use when assessing the feasibility of LEED-certified office developments locally.

Description

Η παρούσα διπλωματική εργασία εξετάζει τις οικονομικές επιπτώσεις της πιστοποίησης LEED στην αγορά ακινήτων της Κύπρου, με έμφαση στα κτίρια γραφείων. Η αυξανόμενη σημασία της βιώσιμης ανάπτυξης και των κριτηρίων ESG (Environmental, Social and Governance) έχει ενισχύσει το ενδιαφέρον για τις πράσινες πιστοποιήσεις στον τομέα των ακινήτων, καθώς οι επενδυτές και οι κατασκευαστές αναζητούν πλέον κτίρια με υψηλότερη ενεργειακή απόδοση και μακροχρόνια επενδυτική αξία. Σκοπός της έρευνας είναι να αξιολογήσει κατά πόσο η εφαρμογή της πιστοποίησης LEED αποτελεί οικονομικά βιώσιμη επιλογή για developers, επενδυτές και ιδιοκτήτες ακινήτων στην Κυπριακή αγορά. Η μελέτη επικεντρώνεται κυρίως στο πρόσθετο κατασκευαστικό κόστος που συνδέεται με την πιστοποίηση, καθώς και στην επίδρασή της στη μακροχρόνια αξία του ακινήτου, στην εμπορευσιμότητα, στα ενοίκια και στη

δείχνουν ότι η πιστοποίηση LEED συνδέεται με μέτριο πρόσθετο κατασκευαστικό κόστος, το οποίο αφορά κυρίως μηχανολογικά συστήματα, ενεργειακές τεχνολογίες και εξειδικευμένες τεχνικές απαιτήσεις. Ωστόσο, τα ευρήματα υποδεικνύουν ότι τα LEED-certified κτίρια μπορούν να επιτύχουν αυξημένη εμπορευσιμότητα, μεγαλύτερη ζήτηση από ενοικιαστές, βελτιωμένη επενδυτική εικόνα και πιθανή αύξηση της αξίας του ακινήτου μακροπρόθεσμα. Συμπερασματικά, η εργασία υποστηρίζει ότι η πιστοποίηση LEED μπορεί να αποτελέσει στρατηγικά και οικονομικά ωφέλιμη επιλογή για την Κυπριακή αγορά ακινήτων, ιδιαίτερα στο πλαίσιο της αυξανόμενης σημασίας των ESG επενδύσεων και της βιώσιμης ανάπτυξης στον τομέα του real estate.

dc.description	Η παρούσα διπλωματική εργασία εξετάζει τις οικονομικές επιπτώσεις της πιστοποίησης LEED στην αγορά ακινήτων της Κύπρου, με έμφαση στα κτίρια γραφείων. Η αυξανόμενη σημασία της βιώσιμης ανάπτυξης και των κριτηρίων ESG (Environmental, Social and Governance) έχει ενισχύσει το ενδιαφέρον για τις πράσινες πιστοποιήσεις στον τομέα των ακινήτων, καθώς οι επενδυτές και οι κατασκευαστές αναζητούν πλέον κτίρια με υψηλότερη ενεργειακή απόδοση και μακροχρόνια επενδυτική αξία. Σκοπός της έρευνας είναι να αξιολογήσει κατά πόσο η εφαρμογή της πιστοποίησης LEED αποτελεί οικονομικά βιώσιμη επιλογή για developers, επενδυτές και ιδιοκτήτες ακινήτων στην Κυπριακή αγορά. Η μελέτη επικεντρώνεται κυρίως στο πρόσθετο κατασκευαστικό κόστος που συνδέεται με την πιστοποίηση, καθώς και στην επίδρασή της στη μακροχρόνια αξία του ακινήτου, στην εμπορευσιμότητα, στα ενοίκια και στη συνολική επενδυτική απόδοση. Η μεθοδολογία της έρευνας βασίζεται σε προσέγγιση μελέτης περίπτωσης (single in-depth case study approach with supporting market evidence) και συνδυάζει ποιοτικά και ποσοτικά δεδομένα. Πρωτογενή δεδομένα συλλέχθηκαν μέσω ημιδομημένων συνεντεύξεων με developers, μηχανικούς, εκτιμητές ακινήτων, asset managers και συμβούλους βιωσιμότητας, ενώ δευτερογενή δεδομένα προήλθαν από διεθνή βιβλιογραφία, ακαδημαϊκές μελέτες, τεχνικές αναφορές και αναλύσεις αγοράς. Παράλληλα, αναπτύχθηκε πλαίσιο ανάλυσης κόστους-οφέλους (Cost-Benefit Analysis – CBA) προσαρμοσμένο στην αγορά γραφειακών ακινήτων της Κύπρου. Τα αποτελέσματα της έρευνας δείχνουν ότι η πιστοποίηση LEED συνδέεται με μέτριο πρόσθετο κατασκευαστικό

REQUESTING ACCESS TO A RESTRICTED THESIS OR DISSERTATION

Some theses and dissertations may have **restricted access**, and their full text may not be immediately available. If you wish to consult a restricted thesis or dissertation for **research purposes**, select the locked file. You will be redirected to a dedicated **“Request a copy of the file”** form. Complete the following fields: (1) **Name**, (2) **Email address**, and (3) a **message** explaining the reason for your request, then select **“Request a copy.”**

* Submitting a request **does not grant automatic access** to the file. Access depends on the approval of the request by the author of the work.
